Thank you for the sample photos. We know this is the most difficult set, and overall it is looking good. Below are our points and questions. For colors, please see the reference photos on the following pages. 谢谢您拍的样品照片。我们知道这是最难的一套，整体看起来很不错。下面是我们的几个问题和疑问。关于颜色，请参考后面几页的参考照片。

- 1 About the blue (navy): we can see the blue is not the same on all caps, and we understand it is not a lighting issue. We prefer the deeper, more even navy. Please use that as the target for the whole set so all caps match. Reference: the caps marked in the photos, and the "Z" cap ("Z" is the target, "H" is the off one).

关于蓝色 (navy)：我们能看出不是所有键帽的蓝色都一样，也明白这不是灯光问题。我们更喜欢更深、更均匀的那种 navy。请以它作为整套的目标颜色，让所有键帽保持一致。参考：照片里标记的键帽，以及 "Z" 键 ("Z" 是目标，"H" 是偏色的那个)。

- 2 About the red: the "Ende" cap has the deeper red we want. Please make the red caps this deeper red. The lighter red (like the "Caps" cap) is not the one we want.

关于红色："Ende" 键的那种更深的红是我们想要的。请把红色键帽做成这种更深的红。偏浅的红（像 "Caps" 键那种）不是我们要的。

- 3 About the gold: the gold on these caps (e.g. Entf, Backspace) is already going in the right direction. Could you please send a few more close-up photos of the gold caps (neutral light), so we can decide if it should be a little more saturated?

关于金色：这些键帽（例如 Entf、Backspace）的金色已经走在对的方向上了。可以麻烦您再拍几张金色键帽的近照吗（中性光线）？方便我们决定要不要再饱和一点。

- 4 It is hard for us to compare the colors, because some photos are not sharp and we cannot tell which caps are meant to be the same color. Please take sharper photos (see the photo guide), and group the caps by their intended color when photographing (for example, all navy caps together). Please also tell us which caps should be the same color.

我们比较颜色有点困难，因为有些照片不太清晰，而且看不出哪些键帽应该是同一个颜色。请拍更清晰的照片（见拍照指南），并在拍照时把键帽按应有的颜色分组（例如所有 navy 蓝的键帽放在一起）。也请告诉我们哪些键帽应该是同一个颜色。

- 5 On some keys, the legend sits too far to the left. Please check the legend position so it is centered and consistent. We will mark the exact keys once we have the high-resolution photos. 有些键的字符太靠左了。请检查字符的位置，让它居中、保持一致。等我们拿到高清照片后，会标出具体是哪些键。

6

We are not sure yet if the line thickness should be a little stronger on a few characters: the arrows on Bild ↑ / Bild ↓, and the @, €, | and μ characters. Could you please send larger close-up photos of these keys so we can decide?

我们还不确定有几个字符的线条是不是要再粗一点：Bild ↑ / Bild ↓ 上的箭头，以及 @、€、|、μ 这几个字符。可以麻烦您拍这几个键的放大近照吗？方便我们决定。

7

Two legend corrections, please: "Menu" should be "Menü" (with the ü), and "Pos 1" should be "Pos1" (no space).

请修改两个字符：“Menu”改成“Menü”（加上 ü），“Pos 1”改成“Pos1”（去掉空格）。

8

Once the set is finished, please send us high-resolution photos of the complete set, so we can check the legends and colors (same photo guide).

等这套做好以后，请把整套的高清照片发给我们，方便我们检查字符和颜色（同一个拍照指南）

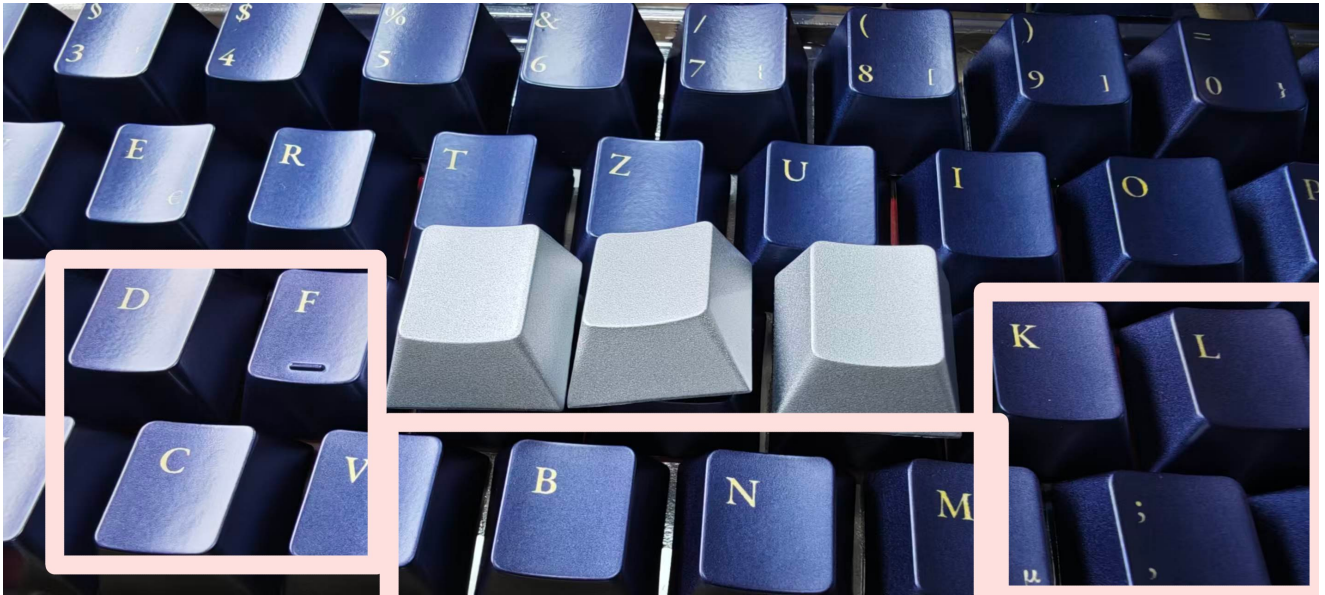

。

Thank you very much!

非常感谢！
