

DeltaSet – Photo Guide for Sample Photos

样品拍照指南

To help us judge the colors and the legends correctly, please take the sample photos as described below. Good photos make the review much faster for both of us.

为了让我们能准确判断颜色和字符（legend），请按下面的要求拍样品照片。好的照片能让双方的确认更快。

- 1** Shoot straight from directly above (90°), with the lens parallel to the tops of the caps. Do not shoot at an angle.
从正上方垂直拍（90度），镜头和键帽顶面平行，不要斜着拍。
- 2** Use natural light or white light. No yellow or colored light, and no flash. Daylight near a window is best.
用自然光或白色灯光，不要黄光或彩色灯光，不要开闪光灯。最好白天在窗边拍。
- 3** Put a sheet of white paper next to the caps in the photo (a gray card or color card is even better), so we can correct the colors.
在键帽旁边放一张白纸一起拍（有灰卡或色卡更好），方便我们校正颜色。
- 4** Use a white or gray background. Do not use the green box or plastic tray.
背景用白色或灰色，不要用绿色盒子或塑料托盘。
- 5** Do not shoot through plastic packaging.
不要隔着塑料包装拍。
- 6** Lay out the complete set (all caps) flat and take one full photo from directly above.
把整套键帽（全部）平铺摆好，从正上方拍一张完整的合照。
- 7** Then photograph each row close-up from directly above, so every character is clearly visible.
每一行按键再从正上方近距离拍，要能清楚看到每个字符。
- 8** The number row especially should be clear: we need to see the small symbols in the bottom-right (e.g. ² ³) and how far the characters sit from the edge of the cap.
数字行要特别清楚：能看到右下角小符号（例如 ² ³）以及字符离按键边缘的距离。
- 9** Group the caps by their intended color and photograph each color group together (for example, all navy caps together). Please also tell us which caps are meant to be the same color, so we can check consistency.
请把键帽按应有的颜色分组，每个颜色组拍一张合照（例如所有 navy 蓝的键帽放在一起）。也请告诉我们哪些键帽应该是同一个颜色，方便我们检查一致性。
- 10** When we ask for close-ups of specific keys, please shoot them straight-on, sharp, and filling the frame.
当我们请您拍某些键的特写时，请正对着拍、对焦清楚、画面填满。

11

Photos must be sharp, in focus, and high-resolution.

照片要清晰、对焦准确、分辨率高。

Thank you very much!

非常感谢！
